

Care of Our Planet Care of Our Neighbour

A weekend of activity, information and entertainment around the theme of sustainability

Or: How to save money and do some good at the same time

- Two-day **exhibition** with lots to do
- Saturday **'TED talks'** every 30 minutes
- 'Sustainable' **lunches and teas** available both days - see how good non-meat can taste!
- Saturday evening **'infotainment'** event – an evening with Prof Mike Hulme, rector Adrian Miller, author and broadcaster Susan Bowden-Pickstock and Dr Ruth Valerio
- Sunday **"Meet the practitioners"**
- **Biodiversity:** activities for children

“

We do not inherit the Earth from our ancestors; we borrow it from our children.

(Native American saying)

”

A Hethel Church Community Event

In partnership with

Where

Hethel Church,
Church Lane, NR14 8HE

When

Saturday 12 and
Sunday 13 September 2015

A weekend of activity, information and entertainment around the theme of sustainability

Here's what's on...

- Explore the “how-to reduce” themes of energy, transport and food.
- Use computers to check your carbon footprint.
- Play energy games.
- Check out the Nissan electric car.
- Find out how to use worms to recycle your waste.
- Watch *An Inconvenient Truth* or *Years of Living Dangerously*.
- Try out different sorts of light bulb.
- Have lunch with us – really good ‘sustainable’ food.
- Pick up a Saturday 20-minute ‘TED Talk’: Community pig farms; 200mph by rail to Madrid; Electric cars; Renewable Energy in your Community – Blight or Benefit?; Reducing Waste – the Five Behaviours; Eating more sustainably; Heat out of thin air.
- Friday evening talk: Dr Ruth Valerio on “Why Christians should care for the planet”.
- Saturday evening: consider climate change in an enjoyable format: Professor of Climate and Culture Mike Hulme and rector Adrian Miller in a sofa conversation chaired by author and broadcaster Susan Bowden-Pickstock. Followed by Dr Ruth Valerio on “How can little me make a difference?”.
- Thinking about making some changes? What are the upsides and downsides? Meet someone on Sunday who owns an electric car, or has installed solar PV, swapped lightbulbs for LEDs or put in an air-source heat pump...
- Biodiversity: What is it? Why does it matter? How can we affect it? Activities in the award-winning churchyard for children and adults.
